

Java

```
class Solution {  
    public int getLastMoment(int n, int[] left, int[] right) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number} n  
 * @param {number[]} left  
 * @param {number[]} right  
 * @return {number}  
 */  
var getLastMoment = function(n, left, right) {  
  
};
```

C++

```
class Solution {  
public:  
    int getLastMoment(int n, vector<int>& left, vector<int>& right) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int GetLastMoment(int n, int[] left, int[] right) {  
  
    }  
}
```
